# STEM WORKSHOPS

Our approach to STEM education is hands-on discovery, with interesting and challenging kits, facilitated by experienced mentors. We provide a state-of-the-art learning environment, with small mentor-student ratios with tried and true STEM kits that inspire fun and discovery. Our workshops are designed to be age and ability appropriate for students as young as 6 through high school. Workshops offered include:

- **Lego Spike**
- **WeDo 2.0**
- **Mindstorm EV3**
- **ELEGOO Smart car robot**
- **Jimu Smart Robot Series**
- **CSI Forensics**
- **Intro to Robotics**

We are STEM Education Beyond the Bricks, Arduinos and Circuits.

# WE HAVE RENTALS

We have meeting spaces for small meetings or large gatherings, a warming kitchen, turf field, recording studio and even an Esports room are available for rent. Additionally, we have projectors, screens, 3D printers, televisions, inflatables, tables, and chairs all available for rent for onsite events.

Atlantic County Sheriff  
(Retired)

**Wayne Schloss**

AllZone  
HVAC/Construction

**Frederick Spano**

EHTPD Chief of Police

We are non-profit, 501(c)(3), youth organization established in 1989. We are NOT funded by taxpayer dollars and rely on public contributions, sponsorships, donations, fundraising activities, grants, and good business practices to provide our programs. Please consider supporting our mission. If you would like to discuss how you or your company can become more involved email us at [EHTPAL@comcast.net](mailto:EHTPAL@comcast.net) or call us at 609-645-8413.

## DISCOVER THE POSSIBILITIES

# STEM SUMMER CAMP

Our Summer STEM camps are similar to our STEM workshops, but formatted to fit your summer time needs. Each camp is 5 days long, Monday through Friday. Each week is different from the previous week, Sign up for one week or multiple weeks.

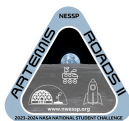

Before care can start as early as 6:30am and aftercare is available until 6pm. STEM camps runs from 8am-4pm with a focus on STEM projects plus outdoor summertime fun. Activities may include waterslides, gaga-ball, and go-karts. Our Summer STEM Camp programs include:

- Lego SPIKE**
- WeDo 2.0**
- Mindstorm EV3**
- Rocketry/Aviation**
- NASA AstroCamp**
- Remote Control Car Construction**
- Intro to Robotics**
- SeaPerch**

## ENFORCERS, AWARD WINNING COMPETITIVE STEM TEAMS

If your youth just can't get enough of STEM or is thinking about a career in a STEM-related field, then joining one of our internationally recognized competitive robotics teams might be just right for him/her. These teams aren't easy. They will challenge your child and help them accomplish more than they ever thought and take them to the next level.

## MEDIA CLUB/CENTER

Our Media Club provides opportunities for young individuals to explore and engage in various forms of media, such as photography, videography, journalism, and digital media. Club members develop their creative and technical skills in media production, learning about the ethical and responsible use of media while creating the social media videos for the organization. The PAL Media Club aims to empower youth by providing a platform for self-expression, fostering teamwork, and promoting positive community engagement through media-related activities.

## RESEARCH

Interested in research? We have that too. Join our high school members on the **Calypso Coastal Research Team**, off the coast of Brigantine in a real life research project. We are observing our coastal marine environment, to determine the effects of dredging on the ecosystem using PAL's Genneino Titan Underwater ROV.

Or join the team bringing the **Black Knight Bomb Disposal Robot** back to life. Its a 600 pound iron beast that served the Philadelphia Police Department for nearly 3 decades. It's seen better days and this team's goal is to bring it back to life and start its new role as PAL's STEM Ambassador.

## STEM CLUBS

Maybe a weekly STEM club, where your child will explore project-based learning, holds their interest. PAL STEM clubs include:

**Buddy's Garage \* Stargazers \* Drone Flyers  
Media Club \* Future Engineers \* Remote Control  
Vehicle Club.**

## ESPORTS CENTER

We have plenty to offer in our E-Sports room! We have 4-4 player Xbox Series X consoles, with 58 inch flatscreens, 2 flight simulators with FPV goggles, 4-2 player retro arcade games with 50+ classic games and a state-of-the-art motion race car driving simulator. **Coming soon...**a 12 station competitive Esports team.

## OBSERVATORY

Perhaps your child's head is in the stars. Our Crossplex is home to a 14-inch Celestron Telescope, an 8 ft observatory featuring a 360° rotating dome. Join us for special celestial events and join our **Stargazers Club**. Members will have an opportunity to look through many different types of telescopes and learn about the universe. Stargazers Club will participate in NASA citizen science and research projects.
